SUMMARY

Lead Frontend Developer with 7+ years of experience building scalable, high-performance applications for US clients. Specialized in Vue 3, Nuxt 3 and TypeScript, with expertise in architecture, reusable components, end-to-end delivery, and engineering leadership.

TECHNICAL SKILLS

FRONTEND
- Vue 3 • Nuxt 3 • TypeScript
- JavaScript (ES6+) • HTML5
- SCSS / CSS3 • Tailwind CSS

VUE ECOSYSTEM
- Composition API • Pinia • Vue Router
- Nuxt Nitro • Server API Routes
- Composables • Vuex (Legacy)

RENDERING & PERFORMANCE
- SSR, SSG, SPA, CSR • Lazy Loading
- Dynamic Imports • Code Splitting
- Core Web Vitals

ARCHITECTURE & APIS
- Headless Architecture • REST APIs
- Axios • Fetch API • Zod
- API Integration

TESTING & CODE QUALITY
- Vitest • Vue Test Utils • Storybook
- ESLint • Prettier • Husky

ACCESSIBILITY, SEO & SECURITY
- Accessibility (WCAG)
- Semantic HTML • SEO Optimization
- Web Security Fundamentals • OWASP

DEVELOPER TOOLING
- Git • GitHub • Vite • Docker
- GitHub Actions • CI/CD

DESIGN & UI ENGINEERING
- Figma • Pixel-perfect UI Development
- Responsive Design
- Cross-browser Compatibility

WORKFLOW & METHODOLOGIES
- Agile Methodologies • Scrum • Jira
- AI-assisted Development
- Code Reviews • Mentoring

PROFESSIONAL EXPERIENCE

Career Break
2025 – 2026

- Family responsibilities and professional development.

Lead Frontend Developer
2019 – 2025

e-Xposures Private Limited, Kerala, India (Remote)

- Owned end-to-end frontend delivery across 5–7 e-commerce platforms, from greenfield setup to release and ongoing development.
- Set up Nuxt 3 + TypeScript applications from zero: Vue Router, Pinia state management, SSR/SSG config, Nitro server routes, and REST API integration for multivendor storefronts with large product catalogs.
- Built a shared Vue 3 + TypeScript component library adopted across 5+ client storefronts — eliminating duplicate UI development, enforcing type-safe prop contracts, and reducing onboarding time for new developers via shared architecture and standards.
- Engineered complex multistep checkout flows and dynamic product filtering UIs with TypeScript-powered reactive state management, supporting conversion-focused e-commerce experiences on high-traffic US storefronts.
- Developed data-heavy admin dashboards with sortable/filterable tables for managing products, metadata, and user data across multiple sites via REST APIs.
- Improved Core Web Vitals and reduced load times through code structure improvements, lazy loading, and performance best practices.
- Worked directly with US stakeholders and engineering leadership in remote-first, async teams across time zones.
- Led and mentored 3 junior developers, conducting code reviews and establishing Vue/TypeScript coding standards across the team.
- Selected client platforms: Envelopes.com, Folders.com, and additional unreleased e-commerce platforms.

Freelance Development & Founder
2016 – 2019

Cyntexia Technologies, Kannur, Kerala, India (Remote)

- Founded and managed Cyntexia Technologies, delivering web solutions for clients across the UAE and India.
- Handled entire project lifecycle independently — requirement gathering, UI/UX design, development, deployment, and maintenance.
- Built responsive websites and web applications using HTML, SCSS/CSS and vanilla JavaScript.
- Managed domain registration, hosting, server configuration, and client support.
- Selected client: Agate Group, UAE (agategroup.org), along with web projects for small businesses.

SELECTED PROJECTS

Multivendor E-commerce Platform
Vue 3 • Nuxt 3 • TypeScript • Pinia • REST API

- Large-scale product catalog with advanced filtering, search & multistep checkout.
- Built vendor/admin dashboards with role-based access.

Canva-Style Design Editor
HTML • SCSS • JavaScript

- Standalone browser-based editor for custom product designs.
- Integrated it across multiple web projects.
